About Me

Mary Wangare enjoys working out, but during the Covid 19 pandemic things were paralyzed and people struggled to access gyms. There was an emergence of tech applications to help people work out from home. From that, she realized that tech could play a big role in everyday life. As a budding software developer, she wants to be able to integrate tech into everyday activity and make life easier for the human race.

Skill

- Understanding of design elements and principles, as well as experience with Adobe suite i.e Photoshop and Illustrator.
- Understanding of OOP in Kotlin.
- Knowledge in Object-Oriented Program in python.
- Knowledge in ideating, defining a problem, testing, and prototyping in UX Research.
